

I would like to express my enjoyed use of services with XM Satellite Radio's localized traffic and weather programming. Use of satellite radio is innovative and I support new innovative technologies. This service provides variety and quality that are not available everywhere. This is a service I PAY FOR! I don't understand why the National Association of Broadcasters is trying to intervene. It should not be up to the NAB to dictate what I am permitted to hear, regardless of technology, and especially if I'm PAYING FOR IT! Instead of competing and improving their services, they want the government to protect their businesses by attacking satellite radio. Not fair. I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming, and innovative technology that I deserve and that I willfully choose to pay for.
